

PARIS AG and its division datango - selected for Fast Growth Icons 2017

We are a member of the Fast Growth Icons Network

Berlin, June 13th, 2017 – Fast Growth Icons is the major invitation-only network for well-established, fast-growing businesses.

Reflecting our success and rapid growth, we are proud to be rewarded as one of the most exciting and successful growth businesses of the future and be selected for this exclusive network together with only a few other German companies.

The qualification to become a member includes various strict conditions. Companies have to show considerable traction in terms of revenue, users or funding. The typical network member has revenues in excess of €15 mio. per year, and is growing at over 50% year over year.

In the past years, Europe has been challenging the success of Silicon Valley and maturing into a vibrant tech ecosystem. VC's from across the globe recognize the potential of many European tech hubs such as Berlin, London and Amsterdam. In fact, Europe has been producing successful start-ups for many years now, however the hurdles that we face of growing to a €100+ mio. business are still very high, but Europe is playing catch up with the US in the unicorn creation tables.

Ben Fletcher, the founder of Fast Growth Icons, is impressed by the imposing growth PARIS made during the last year: "We welcome PARIS as a member and congratulate them for being selected - this is an exclusive achievement reached by only a few German start-ups. We look forward to seeing their business flourish also in the future and hope to support them by our network relationships."

Sebastian Grodzietzki, Chief Growth Officer of PARIS, remarks: "We are very proud to be awarded for our fast growth and become part of the Fast Growth Icons network. This is a great honour and we look forward to a great collaboration with members like trivago, FlixBus, or Babbel."

Brief profile of PARIS AG:

Robotics Intelligence Systems – provides leading technologies for process navigation and optimisation, automation, documentation and e-learning. The solutions from PARIS AG and its datango division support customers by providing targeted process guidance, staff training, faster rollouts and smooth operation of enterprise applications. The solutions feature a context-sensitive navigation aid at the point of need and facilitate automatic generation of documentation, training materials, software simulations and e-learning environments in the live system. As a result, PARIS enables businesses to reduce input errors and support costs, while increasing user acceptance. Features supported by the datango performance suite are an integral component of business processes and applications in companies of varying sizes in a range of different sectors.
